Pitching Instructions- Dining Shelter

Open bag, lay out all the parts & make up the poles- You should have:

1 x Canvas sheet

1 x Steel ridge pole, 2 x Steel uprights, 4 x Steel corner poles

2 x Main guys, with dollies & a selection of pegs

It is best to have 3 people to pitch this dining shelter.

1. Lay out the canvas sheet
2. Slip in the ridge pole, lining up the holes in the ends with the eyelets at either end of the canvas sheet
3. Position each of the long uprights and enter the spikes into the end of the ridge pole, then through the canvas eyelet
4. Slip each of the main guys over the end spikes of the uprights (now protruding from the canvas uprights)
5. With one person holding each long uprights, pull the shelter up into the vertical position.
6. The 3rd person should now peg out the main guy lines, then both sides (4 guys) should be pegged out, stabilising the shelter
7. Insert each of the 4 smaller (corner) uprights
8. Peg out each of the corner and side guy lines
9. Now, go round your shelter, "tensioning / trimming" each of the guy lines to make sure it is stable, taught and square.
